

BROOKLYN BOTANIC GARDEN - BROOKLYN, NY

PRODUCT: WB 36/30

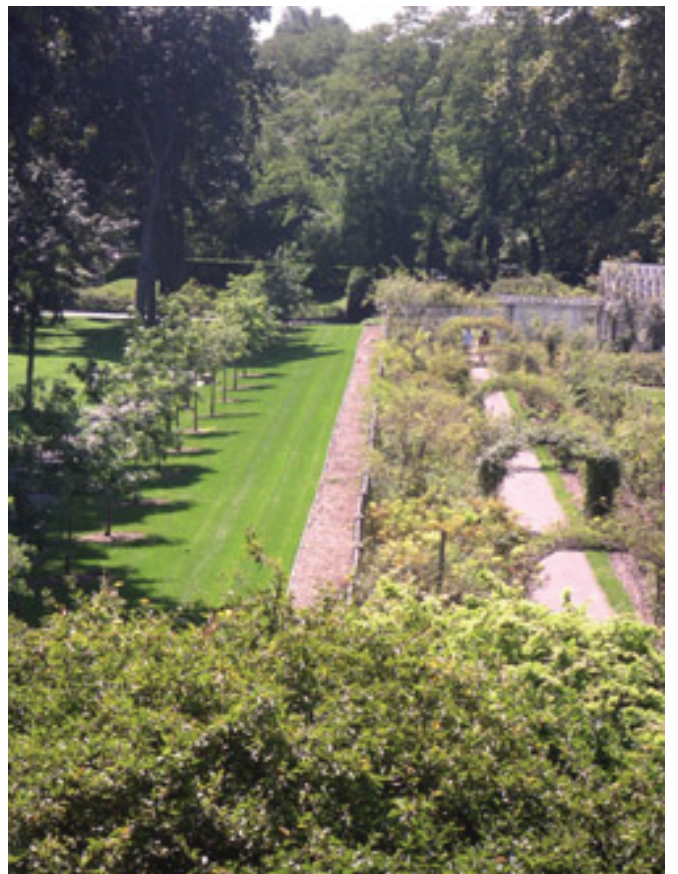

In the spring of 2002 the Brooklyn Botanic Garden planted several Scarlett Oaks (*Quercus coccinea*) as part of their living tribute to the victims of September 11th. Concerned about potential rooting competition between the trees and the adjacent historic Cranford Rose Garden, DeepRoot WB 36/30 was installed along the length of the rose garden to block the Oak roots from entering.

Damaged Multi-Use path

Completed Installation.

Overall view of site.

Note top of block visible to prevent root overgrowth.
