

## LENORA CHURCH ROAD & HENRY CLOWER BLVD., SNELLVILLE, GA GUYING

When it came time to replant the median strips on major thoroughfares in Snellville, Urban Forester Jessica Roth considered her options, then she specified ArborTie to securely anchor the trees. "It was an easy choice" says Jessica, "ArborTie is very economical, and the soft material will never harm our trees. We use ArborTie for all of our guying needs." Each of the trees are also planted with UB 24-2 to prevent future damage to the curb and roadway.
